ISO-Ring®

OPW's patented Gauge Isolation Ring, called ISO-Ring®, is designed to isolate gauges or pressure switches from solids in process flow and to ensure accurate pressure readings.

Lok Product

- **Autolok**™ – Close like a regular quick coupler but automatically.
- **Spring-Ring™ Finger Rings** – Patented design, making secure closing a snap
- **Heavy-Duty Construction** – Available in 316 Stainless Steel
- **Extra Protection** – featuring exclusive Twin-Kam™ design against accidental release or uncoupling.
- **Easy Operation** – Arms lock automatically with a positive click
- **Durable and Efficient** – Designed to ensure optimum flow rates.

Breakaway

- No falling or breaking parts exist during disconnection
- No replaceable parts during reconnection
- Easy to reassemble after separation with simple tools
- Easy operation
- Can be configured as a 'hose handler' to greatly improve hose loading operation
- Available in 2", 3" & 4" sizes

Grounding Units

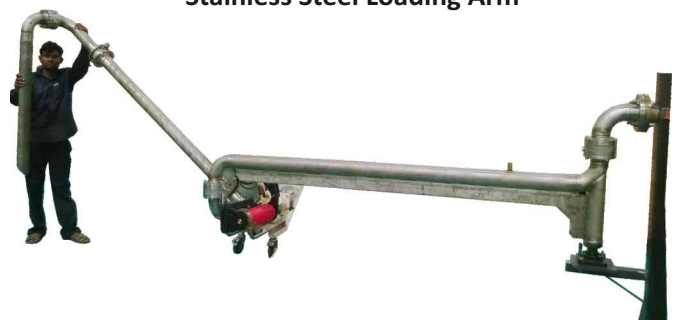

- Ground verification before loading-unloading
- Indication for grounding system – Red & Green Lights
- Signal from Grounding Unit to Loading Systems

Pneumatic Loading Arm

- Easy to operate/maneuver
- Air-controlled actuation eliminates strenuous pushing, pulling or lifting
- Available with precision control package for easy start-up and operation

Stainless Steel Loading Arm

- ✓ **Designed as per customer requirement**
- ✓ **Complete end to end Solution**
- ✓ **Safety and Reliability**
- ✓ **Wide Service Network**
